

***Buy That BBQ!***

***Make the right choice!***

***The BARBITEC 'check list'***

You may think that purchasing a new Barbeque is an easy task, and to some it is, but to the most of us it can be quite a challenge.....

Do I want it on LPG (bottle) or Natural Gas (mains)?

Do I want a grill or hotplate or both?

Do I want it in stainless steel or enamel?

Do I want it 'built-in' or on a trolley?

How many burners? Do I need a side burner?

How much do I want to spend?

What happens if it doesn't work, how do I get it back to the shop?

Also.....

What do I want to cook on it?

How often am I going to use it?

Am I going to use it for entertaining?

Where should I buy it?

Who do I get to install it?

Do I need a sink, hot & Cold water, a fridge in a module unit(s)?

All these questions and more are hardly ever thought of when you go out to buy a BBQ.. So take this check list with you, ask yourself these questions before you go out and again when you are looking at buying one, it may help you to make the right choice.
